

Trouble Brewing

Trouble Brewing

Idioma Inglés

Alcohol is a leading contributor to death and disability worldwide, but governments haven't responded to the issue with the attention, resources and action this urgent issue requires, says "Trouble Brewing", a new report from global health and development organizations, Vital Strategies, the NCD Alliance, IOGT International and the Global Alcohol Policy Alliance. The report debunks misconceptions about alcohol use, exposes industry tactics to market to youth and women and derail regulation, and emphasises the urgency of implementing proven, evidence-based policies.
