[1]

The NCD Alliance invites the global NCD movement to join a webinar on mental health that will be held on:

Monday 18 November 2019 from 3pm - 4:30pm CET // 9am - 10:30 EDT

Mental health conditions are one of the major groups of NCDs with crucial relevance in efforts to control and prevent NCDs. They are associated with significant premature mortality, and a serious cause of disability and years of life lost. Mental conditions also have links to cancer, diabetes, cardiovascular and respiratory diseases and other NCDs.

By sustaining discussions on mental health, we can drive advocacy at global, regional and national levels and improve the lives of people affected by NCDs worldwide. This is crucial as we work towards a world where no one is left behind.

In this webinar, the NCD Alliance will bring together stakeholders in mental health policy, service provision, and campaigning fields, to share insights, perspectives, and opportunities for engagement in advancing progress on improving mental health for all.

Webinar agenda

- Mental Health and the evolving global policy landscape
- Introduction of the Lancet Commission on Mental Health
- World Alzheimer Report 2019: Attitudes to dementia (Overview of findings)
- The vision of the United for Global Mental Health
- The current focus of mental health advocacy, and the role of the BluePrint Group as a platform for joint action.
