
NCD Alliance Post 2015 Advocacy Toolkit

Language English

Advocacy Toolkit on NCDs in the Post 2015 Development Agenda

The NCD Alliance launched our Advocacy Toolkit on NCDs in Post-2015 Development Agenda in February 2015. This toolkit equips advocates with the information to navigate the post-2015 processes; articulate the position of NCDs and health in the post-2015 framework; identify stakeholders and take effective action. By using this toolkit, members of our network can engage in coordinated advocacy to influence post-2015 processes in these final critical months. Particular attention is given to advocacy at the national and regional levels, to ensure NCD prevention and control is central to the post-2015 development agenda. The toolkit is available for download as a navigable PDF in the documents box on the left of this page in English and Spanish.

Advocacy 2-pager: Non-Communicable Diseases, A Priority for Sustainable Human Development

The NCD Alliance has also launched our Advocacy 2-pager on NCDs in Post-2015 Development Agenda in February 2015. The 2-pager provides advocates of our network with a concise and eye-catching resource to be used in their communication efforts. It is available for download as a navigable PDF in the documents box on the left of this page in English and Spanish.
