
Cigarette Package Health Warnings Status Report, fourth edition launched

Cigarette Package Health Warnings: International Status Report provides an international overview ranking 198 countries/jurisdictions based on warning size, and lists those that have finalized requirements for picture warnings. Regional breakdowns are also provided.

This report is in its fourth edition, with the third edition dated October 2012. There has been tremendous progress internationally in implementing package warnings, with many countries increasing warning size, more countries requiring picture warnings, and an increasing number of countries requiring two, three, four or even more rounds of picture warnings. The worldwide trend for larger, picture health warnings is growing and unstoppable, with many more countries in the process of developing such requirements.
