
Expanding Access to Care, Supporting Global, Regional and Country level NCD Action - Programme report

Expanding Access to Care, Supporting Global, Regional and Country level NCD Action - Programme report
Language English

Expanding Access to Care, Supporting Global, Regional and Country level NCD Action, was a 5-year NCD Alliance programme during 2013-2017, aimed at strengthening NCD civil society capacity to stimulate progress on NCD prevention and control. The report documents the programme, outlining good practices and lesson learned, highlighting achievements, and providing examples of successful approaches with the potential for replication in other settings.

Extended Description: Expanding Access to Care, Supporting Global, Regional and Country level NCD Action, was a 5-year NCD Alliance programme during 2013-2017, aimed at strengthening NCD civil society capacity to stimulate progress on NCD prevention and control. It focused on coalition building, multi-sectoral engagement, health systems strengthening, accountability and meaningful involvement of people living with NCDs. The programme's in-country activities were led by CSOs that developed networks for coordinated action on NCDs – Brazil's ACT Health Promotion, the Caribbean's Healthy Caribbean Coalition¹, the South African NCDs Alliance (SANCDAs), and India's Healthy India Alliance (HIA).

This report serves as a resource for stakeholders interested in supporting and strengthening civil society efforts in the NCD space. It supports NCD stakeholders in making the case for coalition building and capacity development of civil society to accelerate action on NCDs. The report documents the Expanding Access to Care, Supporting Global, Regional and Country level NCD Action programme, outlining good practices, highlighting achievements, and providing examples of successful approaches with the potential for replication in other settings.
