Extended Description:

The 2023 second thematic webinar summarised progress against, and gaps within, existing global NCD targets, with a focus on NCD care, including within the context of global targets for UHC. Also, the webinar laid out WHO's work on NCD facility-based monitoring guidance for NCD patient and programme monitoring, including its planned implementation in countries and opportunities for civil society to support the process. It provided civil society with a space to reflect on potential next steps to improve global data availability and corresponding accountability of, NCD care provision, particularly within the context of the upcoming UN High-Level Meeting on UHC in September 2023.

Recording:

Please note that recordings and slides of this webinar are an exclusive benefit to NCDA members (full and associate) and partners. If you are not already a member or partner of the NCD Alliance, and would like to learn more about the benefits of being one, you can [learn more](#) [1] here or directly [apply here](#) [2].

We also offer a free engagement tier through network membership. Network members have free access to webinar recordings after 30 days. If interested in this option, you can apply directly [here](#). [3]
